FORM APPROVED OMB No. 3145-0100 Expiration Date: 09/30/2028

NATIONAL SCIENCE FOUNDATION

ALEXANDRIA, VA 22314

HIGHER EDUCATION RESEARCH AND DEVELOPMENT SURVEY FY 2025

Please submit your survey data by January 30, 2026.

Your participation in this survey provides important information on the national level of R&D activity. The National Science Foundation (NSF) is authorized to collect this information under the National Science Foundation Act of 1950, as amended. Your institution's response is entirely voluntary.

Response to this survey is estimated to require 64 hours. If you wish to comment on the time required to complete this survey, please contact Suzanne H. Plimpton of NSF at (703) 292-7556, or e-mail splimpto@nsf.gov.

The Web address for entering your data:

http://www.herdsurvey.org/

Or send completed form to Support@HERDsurvey.org

Questions?

Technical support:

General survey questions:

Michael Gibbons National Center for Science and Engineering Statistics National Science Foundation mgibbons@nsf.gov (703) 292-4590

Thank you for your participation.

What's New for FY 2025

There were no changes to this questionnaire from the FY 2024 version.

Survey Definitions and Instructions

This survey collects data on research and development (R&D) activities at higher education institutions. Please report R&D activities and expenditures for your institution's **2025** fiscal year.

Fiscal Year (FY)

Please report data for your institution's 2025 fiscal year.

Research and Development (R&D)

R&D activity is creative and systematic work undertaken in order to increase the stock of knowledge — including knowledge of humankind, culture, and society — and to devise new applications of available knowledge. R&D covers three activities defined below — basic research, applied research, and experimental development.

- **Basic research** is experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view.
- **Applied research** is original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practical aim or objective.
- **Experimental development** is systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.

R&D Expenditures

Include all expenditures for R&D activities from your institution's current operating funds that are separately accounted for. For purposes of this survey, R&D includes expenditures for organized research as defined by 2 CFR Part 200 Appendix III and expenditures from funds designated for research.

R&D includes:

- Sponsored research (federal and nonfederal)
- University research (institutional funds that are separately budgeted for individual R&D projects)
- Startup, bridge, or seed funding provided to researchers within your institution
- Other departmental funds designated for research
- Recovered and unrecovered indirect costs (see definitions in Question 1)
- Equipment purchased from R&D project accounts
- R&D funds passed through to a subrecipient organization, educational or other
- Clinical trials, Phases I, II, or III (see definition in Question 5)
- Research training grants funding work on organized research projects
- Tuition remission provided to students working on research

R&D does not include:

- Public service grants or outreach programs
- Curriculum development (unless included as part of an overall research project)
- R&D conducted by university faculty or staff at outside institutions that is not accounted for in your financial records
- Estimates of the proportion of time budgeted for instruction that is spent on research
- Capital projects (i.e., construction or renovation of research facilities)
- Non-research training grants
- Unrecovered indirect costs that exceed your institution's federally negotiated Facilities and Administrative (F&A) rate

Reporting Units						
Please <i>include</i> these components of your institution:	Please do <i>not</i> include:					
 All units of your institution included in or with your financial statements, such as: Agricultural experiment stations Branch campuses Medical schools Hospitals or clinics Research centers and facilities A university 501(c)3 foundation 	 Federally Funded R&D Centers (FFRDCs). This information is collected separately. See the list of FFRDCs: http://www.nsf.gov/statistics/ffrdc/. Other organizations or institutions, such as teaching hospitals or research institutes, with which your institution has an affiliation or relationship, but which are not components of your institution. Other campuses headed by their own president, chancellor, or equivalent within your university system. Each campus is asked to respond separately. 					

Confidentiality Statement

Responses to the confidential items are collected under a pledge of confidentiality and will only be used for statistical purposes. Information from confidential items is not published or released for individual institutions; only aggregate totals will appear in publications. In accordance with the Confidential Information Protection and Statistical Efficiency Act (CIPSEA) of 2018, 44 U.S.C. § 3561 et seq., and other applicable federal laws, your responses will not be disclosed in identifiable form to anyone other than agency employees or authorized persons. Any questionnaire item not marked as confidential will be available on a public use file. Per the Federal Cybersecurity Enhancement Act of 2015, codified in relevant part at 6 U.S.C. § 663, your data are protected from cybersecurity risks through screening of the federal information systems that transmit your data, and by the information security program that protects the agency's systems and data from unauthorized access, use, disclosure, disruption, modification, or destruction, pursuant to the Federal Information Security Modernization Act of 2014 (FISMA), 44 U.S.C. § 3551 et seq.

The following items are confidential:

- The sub-values of institution funds on question 1: institutionally financed research (row e1), cost sharing (row e2), and unrecovered indirect costs (row e3).
- The sub-values of indirect costs on question 12: recovered indirect costs (row f1) and unrecovered indirect costs (row f2).
- Personnel headcounts under each demographic category on question 15: sex (section B), citizenship (section C), highest level of education completed (section D).

Question 1. How much of your total expenditures for research and development (R&D) came from the following sources in FY 2025? (See definition of R&D on the previous page.)

- In rows a, b, c, d, and f: Include both direct and recovered indirect costs (reimbursement of F&A costs from external sponsors).
- Report the original source of funds, when possible.

² Totals for rows e4 and g are automatically generated on the Web survey.

- Funds coming through your institution's 501(c)3 should be reported based on the original funding source (e.g., restricted gifts in row f; unrestricted gifts in row e1).
- Include all fields of R&D (e.g., sciences, engineering, humanities, education, law, arts).
 See full listing in Question 9.

So	urce of funds	R&D expenditures (Dollars in thousands) (for example, report \$25,342 as \$25)
a.	U.S. federal government	(101 example, report \$20,042 as \$20)
	Any agency of the United States government. Include federal funds passed through from another institution. Funds from FFRDC should be treated as direct federal funding.	\$
b.	State and local government	
	Any state, county, municipality, or other local government entity in the United State including state health agencies.	es, \$
	Include state funds that support R&D at agricultural and other experiment stations <i>Public institutions</i> should report state appropriations restricted for R&D activities h rather than in row e, Institutional funds.	
c.	Business	¢
	Domestic or foreign for-profit organizations. Report funds from a company's nonprofit foundation in row d.	\$
d.	Nonprofit organizations	
	Domestic or foreign nonprofit foundations and organizations, except universities and colleges. Funds from other universities and colleges should be reported in row	\$ w f.
e.	Institutional funds	
	1. Institutionally financed research	Ф
	Separately accounted for R&D funded by your institution. Do not include estimated research time. Exclude institution research administration and support (e.g., office of sponsored programs) or other indirect costs.	\$(Confidential¹)
	2. Cost sharing	
	Include committed cost sharing other than unrecovered indirect costs.	\$(Confidential¹)
	3. Unrecovered indirect costs	
	Calculate for externally funded R&D only (preferably on a project-specific basis) using the appropriate cost rate—on-campus, off-campus, etc. • First, multiply the <i>negotiated</i> rate by the corresponding base. • Second, subtract recovered indirect costs.	\$(Confidential¹)
	4. Total institutional funds ²	\$ TOTAL
f.	All other sources	
	Other sources not reported above, such as funds from foreign governments, foreign or U.S. universities, and gifts designated by the donors for research.	\$
g.	Total ²	\$ TOTAL
¹ This	item is confidential. Please see the confidentiality statement on page 4.	

Ques	tion 1.1. Did you include the following types of funding in your responses to Que	estion 1, row e1?			
Type of funding Included					
a.	Competitively awarded internal grants for research				
	Expenditures for organized research projects, involving a proposal or statement of work with expected research outcomes.				
b.	Startup packages/bridge funding/seed funding				
	Expenditures from funds provided to faculty members to begin or continue their research while seeking external sponsors.				
c.	Other departmental funds designated for research				
	Expenditures for research from other departmental or central accounts which do not match the descriptions provided in rows a or b.				
d.	Tuition assistance for student research personnel				
	University tuition assistance, waivers, or remission provided to students working on organized research. Please check "Included" even if these funds are reported as part of the expenditures included under rows a, b, or c.				

the following foreign sources? Expenditures funded by domestic sources that passed through a foreign source should not be reported on this question. R&D expenditures Source of funds (Dollars in thousands) a. Foreign government All levels of foreign government, including national, regional, municipality, or other local government. b. Business Foreign for-profit organizations. Projects sponsored by a U.S. location of a foreign company are not considered foreign. Report funds from a company's nonprofit foundation in row c. c. Nonprofit organizations Foreign nonprofit foundations and organizations, except higher education institutions. Funds from foreign universities should be reported in row d. d. Higher education Foreign colleges and universities and units owned, operated, and controlled by such institutions. e. All other sources \$ Include international governmental organizations located in the U.S., such as the United Nations, the World Bank, and the International Monetary Fund and all other entities sending funds to the U.S. from a location outside the U.S. and its territories. Total¹ \$ TOTAL ¹ The column total is automatically generated on the Web survey. Question 3. Of the total R&D expenditures that were externally funded (all sources other than the institutional funds reported in Question 1, row e4), how much was received under each of the following types of agreements? R&D expenditures Type of agreement (Dollars in thousands) **a.** Contracts (including direct or prime contracts and subcontracts) Contracts are legal commitments in which a good or service is provided by your institution that benefits the sponsor. The sponsor specifies the deliverables and gains the rights to results. b. Grants, reimbursements, and all other agreements Include all other agreements in which payments are received but no good or service other than periodic reporting is required in exchange.

How much of the total R&D expenditures reported in Question 1, row g, originated from

Question 2.

c. Total1

Should match Question 1, row g minus Question 1, row e4

¹ The column total is automatically generated on the Web survey.

\$ TOTAL

Question 4.							
A. Did your institution have a medical school (that is, a school that	Yes □ →	Go to Question 4B.				
awards the MD or DO degree) in FY 2025?		No □→	Go to Question 5.				
B. Of the total R&D expenditures reported in Question 1, row g, how much was expended for R&D projects in your medical school?							
Include projects that are assigned to the medical medical school.	al school or to research c	enters that are organiz	ationally part of the				
			&D expenditures ollars in thousands)

Trials with human patients	Ψ	Φ	\$ <u>TOTAL</u>				
¹ The row total is automatically generated on the Web surve	≽y.						

Question 6. What amounts of your FY 2025 R&D expenditures were for basic research, applied research, and experimental development?

- If possible, these categories defining the type of R&D should be coded at the individual project level by the principal investigator. Estimates are acceptable if necessary.
- See the table below this question for examples.

		R&D expenditure (Dollars in thousand	ds)
Type of research	(1) Federal	(2) Nonfederal	(3) Total¹
a. Basic research			
Experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view.	\$	\$	\$ TOTAL
b. Applied research	_		
Original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practical aim or objective.	\$	\$	\$ TOTAL
c. Experimental development	_		
Systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.	\$	\$	\$ TOTAL
d. Total¹	¢ TOTAL	\$ TOTAL	¢ TOTAI
Column 1 total should match Question 1, row a. Column 3 total should match Question 1, row g.	\$ TOTAL	\$ <u>TOTAL</u>	\$ <u>TOTAL</u>
¹ Row and column totals are automatically generated on the Web s	survey.		

Examples						
Basic research	Applied research	Experimental development				
A researcher is studying the properties of human blood to determine what affects coagulation.	A researcher is conducting research on how a new chicken pox vaccine affects blood coagulation.	A researcher is conducting clinical trials to test a newly developed chicken pox vaccine for young children.				
A researcher is studying the properties of molecules under various heat and cold conditions.	A researcher is investigating the properties of particular substances under various heat and cold conditions with the objective of finding longer-lasting components for highway pavement.	A researcher is working with state transportation officials to conduct tests of a newly developed highway pavement under various types of heat and cold conditions.				
A researcher is investigating the effect of different types of manipulatives on the way first graders learn mathematical strategy by changing manipulatives and then measuring what students have learned through standardized instruments.	A researcher is studying the implementation of a specific math curriculum to determine what teachers needed to know to implement the curriculum successfully.	A researcher is developing and testing software and support tools, based on fieldwork, to improve mathematics cognition for student special education				

Question 7. How much of your R&D expenditures reported in Question 1 did your institution receive as a subrecipient?

- The **subrecipient** for an award carries out the work but receives the funds from a passthrough entity rather than directly from the original funding source. Subrecipients tend to be the co-authors of publications, writers of technical reports discussing findings, inventors, etc.
- Do **not** include contractor or vendor relationships. A contractor or vendor receives payment for goods and services provided. See 2 CFR Part 200 Subpart D Section 331.
- Please report the original source of funds in columns (1) and (2) and the pass-through source in rows a–d. **Examples**:
 - Your university receives federal funds from another university as a subaward (row a, column 1).
 - Your university receives federal funds from a company as a subaward (row b, column 1).
- Funds received directly from an FFRDC should be treated as direct federal funding and not included on this question.

¹ Row and column totals are automatically generated on the Web survey.

Question 8. How much of the R&D expenditures reported in Question 1 did your institution pass through to subrecipients?

- Do **not** include contractor or vendor relationships. A contractor or vendor receives payment for goods and services provided. See 2 CFR Part 200 Subpart D Section 331.
- Please report the original source of funds in columns (1) and (2) and the entity receiving the funds in rows a-d. Examples:
 - Your institution passed through federal funds to another university (row a, column 1).
 - Your institution passed through funds from a company to another university (row a, column 2).

Question 9A–B. What were your FY 2025 R&D expenditures in the computer and information sciences and engineering funded by the federal agency sources below? (R&D expenditures from nonfederal sources will be reported in Question 11.)

- Question 9 total (page 18, row K, column h) should match Question 1, row a.
- A list of federal departments, agencies and subagencies is included as a link on the web survey question.
- If an individual project involves more than one of the 40 fields of R&D, please prorate expenditures when possible and report the amount for each field involved.
- For subrecipient funding, report the agency that sponsored the original award.
- Funding from FFRDCs should be reported under the primary sponsoring agency for that center.

K. Total for All Fields of R&D ²	\$ TOTAL	\$ TOTAL	\$ TOTAL	\$ TOTAL	\$ TOTAL	\$ TOTAL	\$ TOTAL	\$ TOTAL

Column h total should match Question 1, row a.

¹ Key: USDA, Department of Agriculture; DoD, Department of Defense; Energy, Department of Energy; HHS, Department of Health and Human Services; NASA, National Aeronautics and Space Administration; NIH, National Institutes of Health; NSF, National Science Foundation. "Other" includes all other federal agencies.

² Row and column totals are automatically generated on the Web survey.

Examples of Disciplines: Non-S&E Fields of R&D

J. Non-S&E Fields

1. Business Management and Business Administration

Business administration Business management Business, managerial economics Management information systems and services Marketing management and research

2. Communication and Communications Technologies

Communication and media studies
Communications technologies
Journalism
Radio, television, and digital communication

3. Education

Education administration and supervision Education research Teacher education, specific levels and methods Teaching fields

4. Humanities

English language and literature, letters
Foreign languages and literatures
History
Humanities, general
Liberal arts and sciences
Philosophy and religious studies
Theology and religious
vocations

5. Law

Law Legal studies

6. Social Work

Music

(no specific examples)

7. Visual and Performing Arts

Drama, theatre arts and stagecraft Film, video, and photographic arts Fine and studio arts

8. Other Non-S&E Fields

Architecture
City, urban, community and
regional planning
Family, consumer sciences and

human sciences
Landscape architecture

Library science

Military technology and applied science

Parks, sports, recreation, leisure and fitness

Public administration and public affairs

Other non-S&E fields that cannot be classified using the fields listed above

Also, use this category for R&D that involves multiple non-S&E fields if it is impossible to report multidisciplinary or interdisciplinary R&D expenditures in specific fields.

Question 10. Of the amount reported for Other federal sources in Question 9 (row K, column g), which agencies funded this R&D, and how much of the reported amount was from each agency?

If your institution reported \$0 in Question 9, row K, column g, skip this question and go to Question 11.

- Use rows a

 j to list up to 10 agencies that funded the largest R&D expenditures.
- Use row k to report any remaining amount.
- For subrecipient funding in this question, list the sponsor of the original award.
- A list of federal departments, agencies and subagencies is included as a link on the web survey question.

Federal	agencies (list up to 10)	R&D expenditures (Dollars in thousands)

Question 15. How many personnel (headcount) worked in the functions listed below in FY 2025, and in which demographic and educational categories would these personnel be placed?

- Headcount by sex, citizenship, and highest level of education is confidential¹. Total headcount by research function (row A) will be published by institution.
- Include each person only once in headcount. If they performed work in two roles (e.g., researcher and technician), include them in the headcount for their predominant role.
- Include all personnel and students paid from R&D accounts regardless of how much they
 were paid. Pay could be a salary, a stipend, or tuition remission.
- Exclude personnel that would be considered indirect research support such as research administration and other personnel not paid for work on specific research projects.
- **Functions** are defined primarily by the nature of the employee's work, not the employee's level of education. Depending on the nature of their work, a student could be placed in any functional category. **See page 30 for a description of each R&D function.**

¹ This item is confidential. Please see the confidentiality statement on ² Totals are automatically generated on the Web survey.	page 4.				

Description of R&D Functions								
Researchers	R&D technicians	R&D support staff						
Professionals engaged in the conception or creation of new knowledge, products, processes, methods and systems and also in the management of the projects concerned. Include R&D managers in this category.	Persons whose main tasks require technical knowledge and experience in one or more fields of science or engineering, but who contribute to R&D by performing technical tasks such as computer programming, data analysis, ensuring accurate testing, operating lab equipment, and preparing and processing samples under the supervision of researchers.	Not directly involved with the conduct of a research project but support the researchers and technicians. These employees might include clerical staff, financial and personnel administrators, report writers, patent agents, safety trainers, equipment specialists, and other related employees.						

Researcher versus R&D technician

Researchers contribute more to the creative aspects of R&D whereas technicians provide technical support. For example, a researcher would design an experiment, and a technician would run the experiment and assist in analyzing results.

Question 16. How many full-time equivalents (FTEs) worked in the functions listed below in FY 2025?

- All personnel counted in Question 15 should be included in FTE calculations; however, we would expect FTEs to be less than headcounts.
- FTEs for this question are calculated as the total working effort spent on research during
 your fiscal year divided by the total effort representing one full-time schedule within the same
 period. See table below this question for examples of FTE calculations.
- An individual cannot be more than 1.0 FTE. An individual counted as 1.0 FTE for this
 question, would spend 100% of their working effort on research. If an individual exceeds 1.0
 research FTE based on your standard calculations, adjust down to 1.0.
- See Question 15 for descriptions of each function.

	(a) Researchers	(b) R&D technicians	(c) R&D support staff	(d) Total ¹
FTEs (round to 1 decimal place)				TOTAL

¹ Total is automatically generated on the Web survey.

Examples of FTE Calculations

Using labor hours:

The following examples assume a 40-hour work week during a 49-week work year (1,960 hours), which excludes 3 weeks for vacation, holidays, etc. However, you should use the hours per week and weeks per year that typically represent a full-time employee at your organization.

- 10 researchers who spent a combined 13,720 hours on research: 13,720/1,960 = 7.0 FTE
- 1 researcher who works on research 20% of the time for 20 weeks, 50% of the time for another 20 weeks, and full-time for 9 weeks: ((20% * 20) + (60% * 20) + 9)/ 49 = 0.5 FTE
- 2 research technicians who worked exclusively on research but only for 32 weeks: (2 * (32 * 40))/1,960 =1.3 FTE
- 10 student employees during the summer who each worked on research full-time time for 10 weeks: 10 * (10/49) = 2.0 FTE

Using salary:

FTE must be calculated for each individual and then summed for institution reporting.

- 1 researcher with a \$150,000 salary who was employed the entire year and \$120,000 of salary came from R&D accounts: 120,000/150,000 = 0.8 FTE
- 1 research support staff member with a \$60,000 salary for a 9-month appointment, of which \$40,000 came from R&D accounts: (40,000/60,000) * (9/12) = 0.5 FTE

Question 17. In what month did your institution's 2025 fiscal year end?
